## EASYHEALTH PREMIUM VEGETABLE FAT POWDER 67

EasyHealth vegetable fat powders are premium fat powders based on high quality oils and maltodextrin.

The unique production method of EasyHealth fat powders makes them very suitable for adding unsaturated fatty acids to all kinds of dry (pre)mixes. In contrast to commonly used spray dried fat powders, which need to be heated to release the fat in the final product, our EasyHealth fat powders can be added to (powdered) food applications that do not require heating before consumption. They simply dissolve in the product when liquid is added!

We are able to adjust our powders to your specific needs in terms of fatty acid profile, types of vegetable oil and fat-level (up to 66.6 %), making our EasyHealth products the perfect ingredient for all food supplements and sport nutrition products!

### KEY ADVANTAGES

- Solution for adding (poly)unsaturated fatty acids in dry form
- Flexibility to develop powders with specific fatty acid profiles
- Dissolves in liquids without heating
- Vegan

### KEY APPLICATIONS

- Nutritional supplements
- Sports nutrition products
- Dry mixtures/blends
